EXPERIENCE

LINKEDIN

Senior Software Engineer | New York, NY

MAR 2025 – CURRENT

- Overhauled swipe gesture actions on messages, driving a 400% surge in feature adoption
- Supported iOS messaging work for AI hiring assistant launch which drove \$70M+ bookings in first three months of launch
- On loan to Search: owned deep infra investigations that unblocked the team along with performance and UX fixes across the stack
- Built iOS infra layer for server driven UI interaction supporting optimistic updates for partner teams
- Built core Messaging features leveraging SDUI such as Inbox and Conversations

Software Engineer | New York, NY

AUG 2021 – MARCH 2025

- Shipped iOS features across Media, Groups, and Messenger teams to improve member experience in the LinkedIn app.
- Built and coordinated Community Chats, a feature that grouped 10M+ job seekers into group chats to foster community and knowledge sharing, increasing WAU by over 0.5%
- Built LinkedIn media editor on iOS, which received over 300k users daily
- Led iOS rollout of animated GIF support across all media surfaces

SETREP

Founder
